

A well researched list of top 10 mobile app development companies in India.

Top 10 Mobile App Development Companies In India

Everyone in the today's world is going digital with their smartphones, wearables, and IoT devices, and startups and established tech. companies are working harder day and night to roll out more and more useful and high quality consumer and business apps, games, and services to satiate user's ever increasing appetite to consume better tech. products. It was the story of last decade when latest tech. was first made available to only large enterprise or govt since these days, every new technical you can think of is available to end users, whether it is for messaging or video or Virtual reality or booking a cab or everything else is now available to end users. And when demand for great apps is increasing in this era, the demand for hiring [best App development companies](#) is at all time high as well, the companies that convert your ideas into real tangible mobile apps, and when every App Development Company claims themselves as one of the Top 10 Mobile App Development Companies In India, we thought of creating a well-researched list of real **Top 10 Mobile App Development Companies In India** on the basis of various critical factors. This list of Top 10 Mobile App Development Companies In India would help anyone who is looking to hire an App development company for their Mobile App or Game projects.

Being an app development company ourselves, we know that hiring an app agency is like hiring a technology partner for your organization for longer term and its not going to be just one off Vendor-buyer relationship and therefore following are the critical factors we considered while compiling this list of Top 10 Mobile App Development Companies In India.

1. No. of Years in business.
2. Target customer base (startups, funded startups, mid size companies or enterprises).
3. Versatility and variety of their portfolio (we considered apps not older than 2 years).
4. [Average cost of App development](#) as per the online info available on sites like clutch, goodfirms etc.

5. Demography they serve.
6. Customer reviews and average rating (based on info from clutch, upwork, goodfirms).
7. Quality of Apps (we checked 2 apps per company, manually).
8. Overall score, online reputation, and media presence.

Based on these factors, following is the list of

Top 10 mobile app development companies in India

1. Sourcebits (Bengaluru)

Sourcebits is one of the fine mobile app development companies in India and headquartered in San Francisco, US and operational in Bangalore, India. Sourcebits mostly work with high budget customers, funded startups, and enterprises. Their quality is actually good, and they on an average charge \$ 25000 for an app development project, which is much higher for privately or lesser funded startups and therefore not all can afford their services.

2. Fueled

Fueled is an award-winning mobile NYC based mobile app development company that also work in India, and they are famous for building highly polished apps, they are creating apps for customers since around 10 years, and their minimum project price is \$ 50,000 and hourly rates are between \$ 150 to \$ 199 per hour, and this is again that not all startups can afford.

3. Agicent App Company

We rank ourselves at no 3, and why? Agicent App Company is one of the best mobile app development companies for startups, early-stage entrepreneurs, and even enterprises and offers great quality App development services at highly affordable prices, that almost any startup can afford. The average project price at Agicent is \$ 5000, though you can hire us for even smaller ticket app projects and Agicent would work equally good. On hourly basis, the charges vary between \$ 15 to \$ 20 per hour, though we encourage you to hire for fixed price only if your requirements are defined, fixed price app development helps keeping the budget controlled.

Agicent is a focused team of rock solid app developers, designers, testers, architects, and App consultants that work super fine on complex to simple projects, with an objective of **offering the great quality of services and professionalism to their customers at a fraction of the cost of what bigger app development companies charge.** Agicent is serving customers as an App development agency since 8 years and created more than 300 apps, games, and websites so far. There is hardly any category of apps that we've not developed, whether it is social, dating, or utility, or location-based, business apps or some complex PoC demonstrating the functioning of an algorithm, we've been doing it all. We recently got covered by big Media publications and news sites, like Huffington Post and Daily Mail for **Pregmo** App, the news can be read here - <https://goo.gl/oyy9Ez> and keep getting recognition from our customers and third parties, and that works as a fuel for us to do more good quality App development work.

Agicent works on both native and cross-platform tools and uses modern technology for creating backend or front ends like node.js, angular.js with Mongo DB, AWS. We work as a team with our customers and understand the importance of clear communication, transparency, quality, and planning and therefore none of our projects has gone bad in last so many years. Also, we keep educating our customers on newer technologies, best practices and also assist them in controlling the budget.

In addition to all that we offer, we also help our customers by free initial marketing boos to your apps by FREE App Store Optimization, marketing, and social boosting on our own social networks. **We are the best friends of early-stage startups, and our customers can vouch for this.**
